

**Weather Master™** is a hydrocarbon resistant film sealer with elastoplastic qualities. This product is available in custom colors.

## Applications

- Concrete
- Granite
- Marble
- Tile
- CMU Block
- Cinder Block
- Brick
- Metal

**Excellent resistance to chemical and environmental factors, outstanding longevity, and spot repairable when damaged**

## Advantages

- May be applied over other coating systems
- Prevents moisture penetration
- Prevents freeze-thaw damage, spalling, chipping, and crumbling of brick and concrete
- Designed to at least double the life-time of an existing painted surface
- Enhances the appearance of many surfaces while remaining ultra clear
- Helps keep building cool by refracting infrared rays
- Penetrates up to 1/8" into the substrate
- Completely opaque to U.V. radiation in frequencies below 2,800 AU
